Examples of rejection reasons are given in italic.

Reject a submission if it is:

➤ Mainly composed of offensive, pornographic or immoral content. *Reject: A list nude pictures of a porn star.*

➤ Is deployed with parameters making it obviously insecure. *Reject: A list with a challenge period duration of 0.*

➤ Malformed, has poor encoding due to improper/malicious interaction with the contracts. *Reject: A list with a primary document which can't be opened.*

➤ Is a duplicate (i.e. there is another accepted submission for the same address).

➤ The list logo does not use a transparent background.
