# Acceptance policy for the 'list of lists' of domain contracts

Version 1.0

## Rules:

- Accept all registries that have:
  - Exactly the following fields:
    - Domain name (string)
    - Token Ticker (string)
    - Version (integer)
    - Data object (JSON file with [this schema](#))
    - Additional information
  - A statement in its description of the range of number of addresses it covers (i.e. the *metadata.tcrDescription* field in the *_registrationMetaEvidence* object of the contract).
    - The range must also not be the same as that of any existing registries.
